

## My wishes for the year 2026 and beyond

2026 substitutes for 2025: How to articulate wishes, when you envisage jetty times and lucid voices are ignored?

La Fin de Tout - Le Chant du Monde  
Jean Lurçat

A quote from the communication by Palestinian Christians to the world  
Kairos Palestine 14-11-2025: A Moment of Truth. §3.3

“Genocide is a cumulative process – one that began in the minds of the settler-colonial powers of Europe when they denied the image of God in others and legitimized death, domination and slavery. We consider the State of Israel, established in 1948, to be a continuation of that same colonial enterprise built on racism and the ideology of ethnic or religious superiority. This project settled Palestine and worked to displace the indigeneous people of Palestine from the time of the Nakba until today. Our present Palestinian reality is the inevitable outcome of Zionist ideology and the supremacist settler-colonial movement, itself a product of the imperial mindset.”

The list of wishes for 2026 is long. Some examples:

- Discard the Western imperial mindset, and tax heavily the imperial mode of living
- Know that Western democracy is a rhetoric euphemism for concealed totalitarianism
- Stop stupid militarism, the road to perdition
- Spend money on public goods: education, health, culture, public transport, ...
- Slash private Big Money
- Simply cancel the financial debt of the Global South
- Check and ignore the pulp and fake news by mainstream media
- Let fossil fuels rest in the Earth's crust
- ...

**Evidently, I wish you happiness, good health, interesting and pleasant activities, enthusiastic plans, inspiring encounters, ... all what really enriches life on Earth.**
